

Wellness for You. Intelligence for Better Health.

AI-Powered Preventive Wellness Platform

Track.

Understand.

Prevent.

Your health generates valuable information every day.
Haify turns that information into meaningful insights
for better health decisions.

THE PROBLEM

Healthcare Often Starts Too Late

Most health problems don't begin with a hospital visit.
They develop silently through changes in:

The missing piece
is continuous prevention.

Instead of waiting for a problem to become serious,
Haify helps identify **patterns, risks and changes earlier.**

WHAT IS HAIFY?

Your Health. Connected. Intelligent.

Haify is a digital preventive wellness platform that brings health information together and uses AI to generate meaningful insights.

Haify helps you:

TRACK

Vitals, health information
and wellness indicators

UNDERSTAND

Identify patterns, trends
and potential risk signals

ACT

Receive personalized
recommendations and
wellness support

One platform. One evolving health record.

All your health information, working together for a healthier you.

From Health Data to Action

A simple 4-step process.

Haify transforms health data into **actionable intelligence**.

YOUR PERSONAL HEALTH RECORD

Your Health History, Always Within Reach

Replace fragmented records and forgotten information with a digital health record.

With Haify:

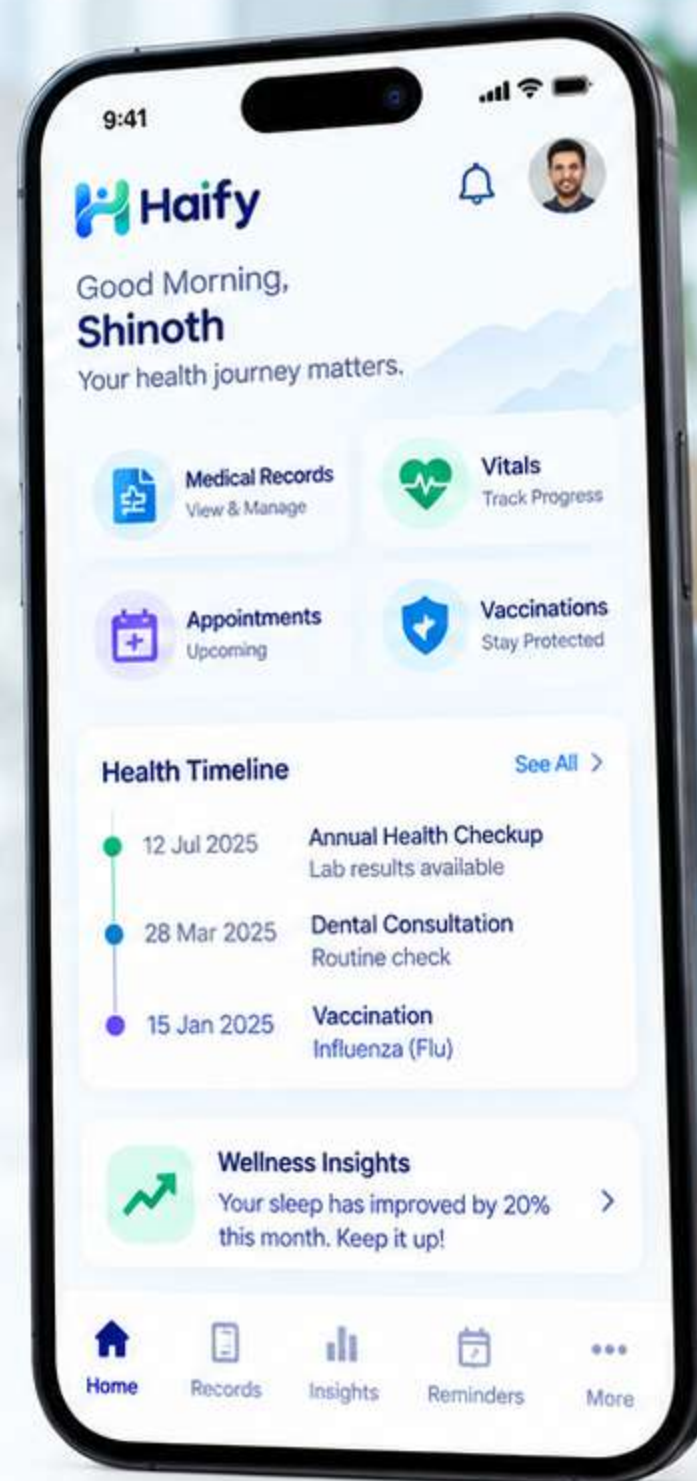

-  Access medical records from your phone
-  Keep important health information organised
-  Track vital health information
-  Receive appointment and vaccination reminders
-  Monitor wellness trends over time
-  Access personalized wellbeing and diet support

Your health story doesn't start from zero at every consultation.

FOR DOCTORS & CARE PROVIDERS

Better Visibility. Better Follow-Up. Better Continuity.

Haify helps healthcare professionals see the bigger picture—not just a single consultation.

For Doctors

Continuous visibility

Monitor patient progress and changing health indicators.

Faster access

Quick access to relevant medical history.

Better follow-up

Track improvement between consultations.

Remote care support

Useful information for long-distance consultations.

Digital records

Reduce dependence on physical documentation.

From episodic consultations to connected care.
